Industry Partnership Grants :: Issued 2009-2010

Convening grants are typically issued for 6 months up to \$25,000 each to organize employers and other industry partners; evaluate current workforce systems, employee skills sets, and regional assets and challenges; and develop an industry-specific strategic plan that incorporates both long-term and short-term training solutions.

Training grants are typically issued for one year for an industry partnership to implement training on skills that match labor market needs. Training might advance career pathways, incumbent workers, on-the-job initiatives, industry recognized credentials, and supportive services.
